## [Looksmax] Increasing the prominence of your supraorbital ridge

Using a weight plate, pummel the red zone of your supraorbital ridge. Apply more force centrally.

I normally use a 10 or 15kg weight plate, but smaller plates are also effective. The edges of thinner plates tend to be less smooth though so you're more likely to get red marks on your face.

Don't place a towel or other piece of clothing over your head. They will increase friction, causing your skin to peel off and you to start bleeding with only a few hits.

This exercise will 'pump' that area for most of the day, and over time permanently increase the prominence of your supraorbital ridge.

Will this make me look like a subhuman caveman?

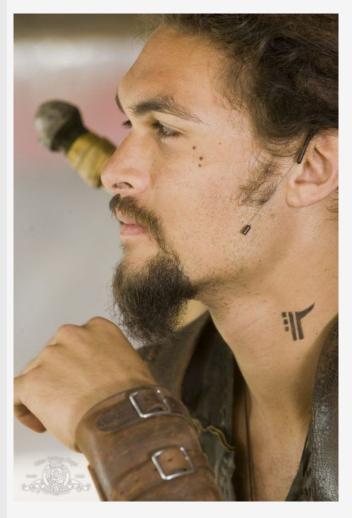

No.

[Image: zaza-pachulia-basketball-headshot-photo.jpg]

If you look at Zaza Pachulia, you'll see that his supraorbital ridge is very prominent at the outer parts.

In contrast, hunks such as Jason Momoa, Miro Cech and Gandy all have brow ridges that are more prominent at the glabella, which is where this exercise targets.

zygos definitely, I'm still not sure what the best way to approach the chin is though.

Here are some examples demonstrating the malleability of the face for those unconvinced:

This guy is using an incredibly inefficient technique, but look at those damn zygos.

Normal people don't have zygos like this.

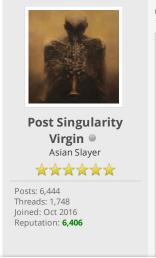

5to9 posted this one.

Compare her craniofacial development to the average girl her age and there'll be a massive difference. I've never seen a girl with a brow ridge that prominent before, she looks like an amalgation of O'Pry and Barrett.

if you put her face on a 6 foot male she would be a chad

man this is extremely eye opening

imagine a 300 dollar machine that automatically does this? every single guy would buy this shit lol, literally it would be worth the social stigma

do you think this would work on low surface area locations like the chin and rammus?

What about skin health? Or infraorbitals? This seems like it would cause permanent soft tissue damage.

Yea, she totally looks like this

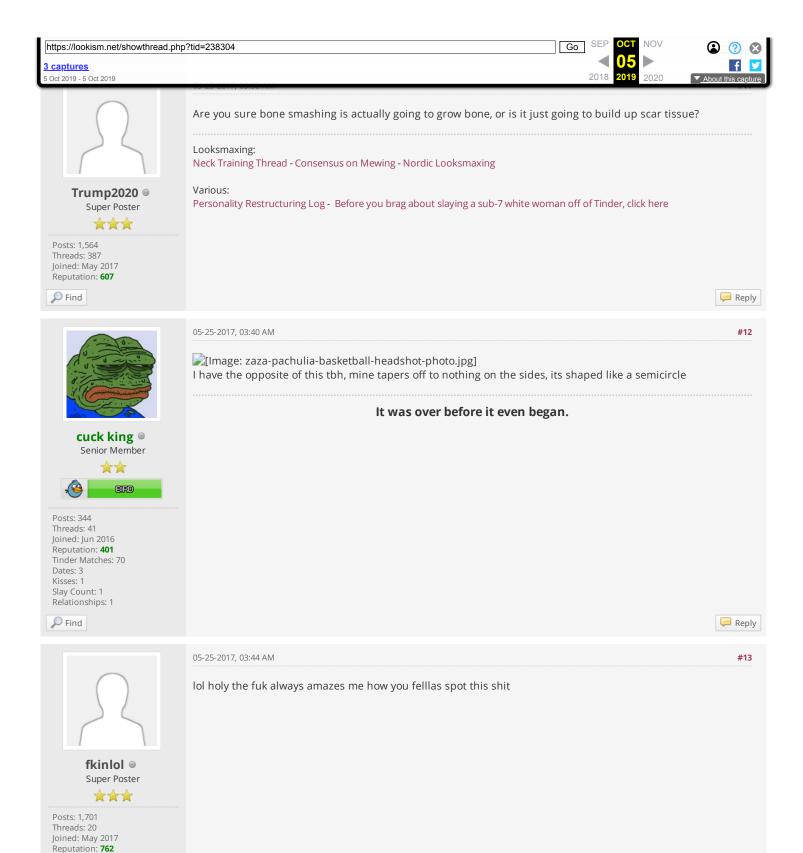

WTF are you talking about buddy

IMO, this is great for literal retards because their brains are already fucked, so they can bash their heads in as much as they want and they are still retarded.

But I'm skeptical if a regular healthy human could undergo the amount of blows they've taken to the face and still be fine mentally. I mean that kid was kicking himself in the face as hard as he fucking could Imao.

Go

Oct 2019 - 5 Oct 2019

but I truly believe that it is from fucking YEARS of repeated blows to the head, everyday, for hours on end. What else does an autist do?

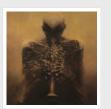

I met a guy who legit took his dick from 6.5 to 8 inches long... after like 7 years of jelqing and massaging and shit. he would go at it for 3 hours everyday.

Most things like this are legit but they just take nearly a decade of dedication. The possible brain damage that could also occur outweighs the few mm in bone mass. Just visit fucking Eppley and have him cement you up instead tbh.

Those aren't autists, they are just hardcore looksmaxxers

fuck man, in the thumbnail he nearly looks like Barrett with that flanging

I mean the risk/reward is somewhat skewed, yeah it would be more efficienct just to work and then get surgery but if were talking about efficiency its probably just more efficient to be a normie why even bothering posting on psl?

Is this the reason why MMA fighters have such prominent browridges?
